STEELBUILT CURTAINWALL INFINITY™ SYSTEM

The SteelBuilt Curtainwall Infinity™ System can use as a back mullion almost any type of custom steel member, such as stainless steel, box, I-beams and T-shapes. This allows architects and designers to use larger areas of glass, smaller frame profiles and wider free-spans than are possible with traditional aluminum curtain wall. This flexibility in design and material allows curtain walls to be incorporated into a nearly limitless range of building types, designs, and performance requirements. SteelBuilt Curtainwall Infinity System helps inspire a whole new world of creativity.

LAWS AND BUILDING AND SAFETY CODES GOVERNING THE DESIGN AND USE OF GLAZED ENTRANCE, WINDOW, AND CURTAIN WALL PRODUCTS VARY WIDELY. TGP DOES NOT CONTROL THE SELECTION OF PRODUCT CONFIGURATIONS, OPERATING HARDWARE, OR GLAZING MATERIALS, AND ASSUMES NO RESPONSIBILITY THEREFOR.

Metric (SI) conversion figures are included throughout these details for reference. Numbers in parentheses ( ) are millimeters unless otherwise noted.

The following metric (SI) units are found in these details:
m – meter
cm – centimeter
mm – millimeter
s – second
Pa – pascal
MPa – megapascal

TGP reserves the right to change configurations without prior notice when deemed necessary for product improvement.
FEATURES

- Almost any type of custom steel member can be used for a back mullion—such as stainless steel, box, I-beams and T-shapes
- Offers all the advantage of steel: larger free spans, narrower sight lines and improved thermal performance
- Narrow sight line of 1-3/4" (45 mm) or 2-3/8" (60 mm)
- No water penetration at 15 PSF pressure differential when tested to ASTM E283
- Air infiltration below 0.03 CFM /Ft² when tested to ASTM E33
- Variety of system depths
- Infill options up to 2"
- Stainless steel or anodized cover caps available
- Painted finishes in standard and custom choices
- Concealed fastener joinery creates smooth, monolithic appearance
- Shear block fabrication method
- Compatible with SteelBuilt Window & Door® Systems
- Silicone compatible glazing materials for long-lasting seals

OPTIONAL FEATURES

- Stainless steel cover caps
- Custom aluminum cover caps available

PRODUCT APPLICATIONS

- Ideal choice for tall span applications with no intermediate support
- Ideal for low to mid-rise applications where large glass and narrow sight lines are desired
- Coastal environments that benefit from the durability of stainless steel
• For combination with all SteelBuilt mullion-transom façade systems
Reference Details – I-Beam

Materials:
- Carbon Steel
  - Blasted
  - Painted
- Stainless Steel
  - Blasted
  - Polished
  - Ground
  - Pickled

Member dimensions (depth, material thickness, etc.) dependent on span, load, and module dimensions.

Webs can be custom machined with
- Patterns

Reference Details – Framing Options

Framing Options:

Descriptions below are suggested options for framing as may be developed by design professionals. TGP is available to assist the design professional with any questions regarding attachment or support of SteelBuilt Curtainwall Infinity™ System glazing materials not furnished by TGP.

Method of attachment of Infinity glazing materials to other framing options is permitted. This work is typically completed by the installer in the field.

TGP does not typically design, furnish, or finish these materials. Design of these members is not by TGP, and should be verified by registered, licensed professional engineers or architects.

Glue-laminated wood: any shape, size, and profile

Steel or aluminum:
- Hot rolled steel or extruded tubes, rounds, or structural shapes
- Truss assemblies
- Structural steel framing

Sloped or vertical framing (with safety glazing) is permitted.
DESIGN NOTE:
1. IF MEMBER LOADING AND DESIGN AESTHETICS ALLOW: TO INSTALL HORIZONTALS BETWEEN I-BEAMS, THIS DIMENSION MUST BE GREATER THAN DEPTH OF HORIZONTAL

2. IF DIMENSION BETWEEN BACK OF HORIZONTAL TO IJS FACE OF FLANGE IS LESS THAN HORIZONTAL DEPTH, 1MM JOINT AT MULLION DLO REQUIRED!

DEPTH OF VERTICAL / INSTALLATION OF STEELBUILT HORIZONTALS AT I-BEAM, TR PROFILES
Corner Options

Corner Mullion configurations shown herein are generic. Contact TGP for questions regarding proposed configuration(s).

Corner mullion can match depth of typical mullion as shown, or depth of horizontals (shown dashed, depending on load, modules, etc).
